## 常见问题与解决办法

### 1、遥控器可以安装其他 APP 吗？

遥控器端权限全开放，没有任何专用软件和限制软件的安装与卸载。

### 2、使用第三方网口摄像头如何获取 RTSP 地址

网口摄像头网段需要提前设置为144网段（ip192.168.144.XXX，网关192.168.144.10）摄像头连接接收机网口 0 或网口 1，引脚定义见本文《一、概述->5.端口定义图》部分。可以网口摄像头先连接电脑，用电脑VLC 先用 144 网段的 RTSP 拉流此 RTSP 地址需和网络摄像厂家询问，在接入接收机。打开 H30 助手，打开视频查看点击设置（虚拟按键），点击视频流地址，输入电脑 VLC 输入的 RTSP 开头的链接。

### 3、数传无法连接

飞控数传线连接串口 0，飞控 RX TX 到接收机需要反接正确接法 RX 接 TX，TX 接 RX。检查地面站是否是 TCP 的类型去连接遥控器，地址为 192.168.144.101 监听端口是否为 14550。检查波特率是否与飞控相同。

### 4、无法共享数传或图传

请检查网线是否有连接到遥控器,以太网是否设置了静态 IP，网口摄像头网关 192.168.144.10

### 5、遥控器如何进入快充模式？

必须使用专配的充电器才会进入快充模式，方可进入快充。

### 三、保养、维修

长期停放时的维护、保养

将遥控器存放于干燥通风处，减少阳光直射以防止电池过热。若需存放超过一个月，必须定期将遥控器电池充电至70-80%存放，以免造成电池电量耗尽亏电。推荐的存放温度区间为 22 摄氏度至 28 摄氏度。切勿将电池存在于低于零下 20 摄氏度或高于 45 摄氏度的场所。

### 四、运输、储存

#### 警告

为避免可能的伤害和损失，务必遵守以下各项：

由于线材和小零件可能对儿童造成危险，所以务必让儿童远离遥控器的部件。

#### 注意

- 1) 切勿让遥控器浸入水中，若入水，请及时用松软干布擦拭，并立即关闭电源，返回本公司售后。
- 2) 禁止机械撞击、碾压、刺穿电池，禁止将电池跌落；

### 五、售后地址与技术支持

## A. Overview

### 1、Product Features

(1) The H30 uses the newest Qualcomm Snapdragon 660 8-core processor, equipped with an Android 9 (64bit) embedded system and advanced SDR technology, also with a super protocol stack to make the image clearer, lower latency, longer distance transmission, and stronger anti-interference. Wildly applied for drones, Robots, industrial controlled equipment, etc.

(2) Supports rich interfaces such as HDMI, RJ45, sensor interface, dual serial ports passthrough transmission, SBUS, aerial photography, FPV security, fire protection, power, mapping robot, border control, etc.

(3) Equipped with IP65 waterproof, dust-free structural design, ensuring not only good using feel but also durability.H30 uses 10.1-inch FHD high-brightness IPS LCD screen display, which can be viewed clearly under the sun. The resolution is 1920\*1200. Supports 1080P high-definition digital image transmission. The dual-3 frequencies antenna signals complement each other, with super-strong signals and ultra-long transmitting distances, combined with algorithm control and out-of-step frequency hopping algorithms, greatly increasing the ability to communicate with weak signals. So you don't need to worry about the flight distance during flight operations, just explore a wider scenery. Built-in dual speakers, triple frequencies as 800M, 1.4G, 2.4G, WiFi 2.4 & 5G.

(4) Integrated with high energy density lithium ion battery, can work for 5 hours after full charging. The consistent survival thinking in the wilderness allows you to have no concerns about the reliability of our equipment.

(5) H30 supports rich interfaces such as HDMI, SIM card, USB, Type-C, RJ45, PPM and dual serial port passthrough transmission, dual net ports and SBUS for the R30. And supports many brands cameras, pan-tilts, pods and other video equipment. Provide development kit, SDK and technical support, support video suspension, support ground station of mainstream flight control, support QGC and wireless RTSP video stream sharing.

(6) The use of weather silica gel, frosted rubber, stainless steel, and ABS makes the extreme operating feel, and also meets the harsh conditions of outdoor use of drones..H30 is dust-free in the fuselage, control switches, and various peripheral interfaces. Protective measures such as splashing can ensure stable and smooth operation of the equipment in harsh environments.

(7) Rich ground-end interface, RJ45 network interface, long-distance connection to the internal network, Type-C Android high speed USB interface, OTG interface can be connected to U disk and network card, etc., expanded TF card slot.

(8) An independent 2-dimensional gimbal joystick makes the gimbal flying with great facility, like a duck to water.

(5) Select 14550 as the port number on serial port 0, and click OK to connect (see the figure below).

(6) Select 14551 as the port number on serial port 1 and click OK.

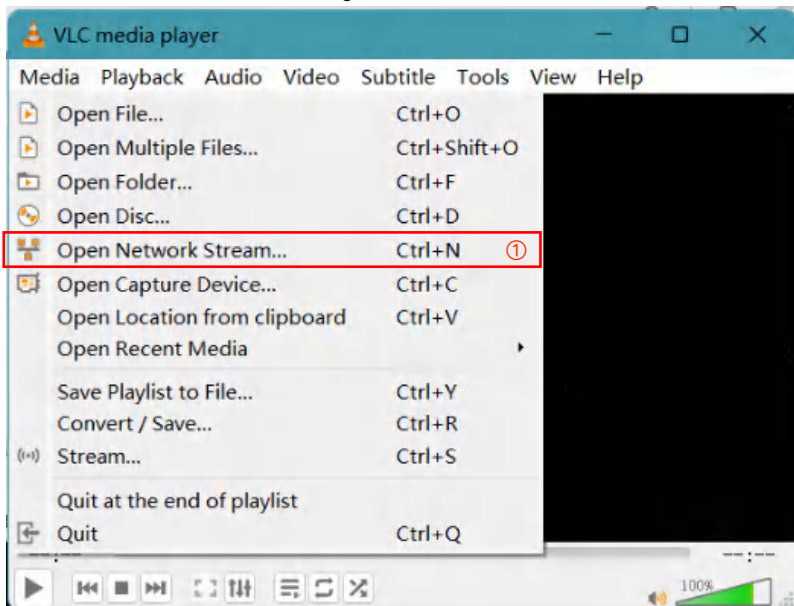

## 2.Sharing video/image transmission

Connect the network cable as described above, share telemetry ->set a fixed Ethernet IP address.

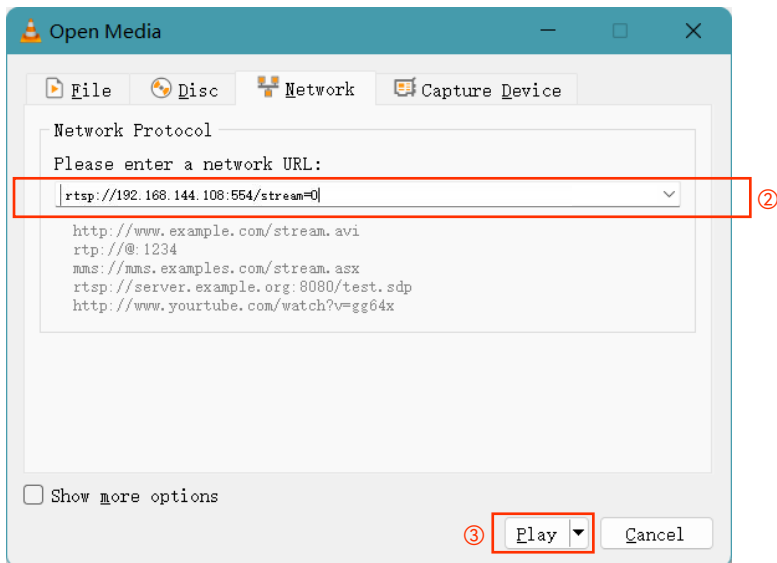

Download VLC exe. to show video/image

① Open VLC and choose network streaming

② Enter "rtsp://192.168.144.108:554/stream=0" to URL and click "play"

## Q & A

### 1、1.Can the remote control install other apps?

The permissions of the remote control are all open, and there is no special software or restricted software installation and uninstallation.

### 2、 How to obtain RTSP address using a third-party webcam

The network segment of the webcam needs to be set to 144 network segments in advance (ip192.168.144.XXX, gateway 192.168.144.10). The camera connects to the receiver network port 0 or network port 1. For pin definitions, please see "I. Overview ->5. Port Definition Diagram" in this article. You can connect the network camera to the computer first, and use the computer VLC to pull the RTSP of the 144 network segment first. The RTSP address needs to be inquired from the network camera manufacturer before accessing the receiver.

Open the H30 assistant, open the video view, click Settings (virtual key), click the video stream address, and enter the link at the beginning of the RTSP input from the computer VLC.

### 3、 Telemetry cannot be connected

The FC'S data transmission cable connects to the serial port 0, and the correct connection method is RX to TX, TX to RX is required for the flight control RX TX to receiver.

Check whether the ground station APP is a TCP type to connect to the remote controller, and whether the address is 192.168.144.101. and the listening port is 14550. Check whether the baud rate is the same as the flight control.

### 4、 Unable to share telemetry or image transmission

Please check whether the network cable is connected to the remote controller, whether the Ethernet has a static IP address set, and whether the webcam gateway is 192.168.144.10

### 5、 How does the remote control enter the fast charge mode?

dedicated charger to enter the fast charging mode.
